Software Solution Architect

Number of Positions: 1

Contract Type: Indefinite

Job description
Responsible for orchestration and execution of tasks related to the pre-sales, fit-gap analysis, functional design, testing and documentation of software components in, or extension of, Microsoft Dynamics 365, focused on Supply Chain Management, Finance and Operations as well as our ISV software products. The solution architect will spend the majority of their time designing and proving the best business solution architecture for clients. Activities include operational, strategic and roadmap workshops with customers, analysing customer requirements, modelling business processes, teaming up with the consulting team to write functional designs, testing software components and documenting them. They are also responsible to coordinate with consultants and software engineers to design and craft the client business solution. Solution architects provide the sales people of the company with the necessary knowledge to drive business which includes but is not limited to, pre sales solution design for current and upcoming technologies, licensing of the right Microsoft Dynamics 365 products, preparing fact-sheets, preparing slide-decks and giving presentations to customers about a specific business knowledge area, both more generic and with a specific focus on Retail, Wholesale and Financial services.

Tasks and Responsibilities:
- Support sales team with demonstrations and defining solution scope for prospects.
- Capture, assess, and define client's business requirements and create strategies to meet those objectives using practical Dynamics 365 business solutions and industry best practices.
- Document and review all business processes, Gap/Fit Analysis findings, functional design documents, testing scripts, training documents and progress updates throughout implementation lifecycle
- Coordinate, design and re-engineer business processes using best practices and standard Dynamics 365 business procedures om collaboration with the consulting and development teams.
- Actively organise and facilitate workshops, in-house seminars, webinars, and knowledge transfers with clients and team members.
- Coordinate with Project management to assist the consulting and development teams.
- Responsible for projects estimations with respect to the internal Implementation methodology.
- Responsible for the design and implementation of client business solutions and its acceptance.

Requirements
Required Skills and Experience:
- Minimum of 8 years' experience working with Microsoft Dynamics AX or 365 Finance and Supply Chain.
- Understanding of Business Process Modelling.
- Has a proven track record and experience in business consulting and implementation consulting roles.
- Familiar with Project Management methodologies like e.g. Agile and Surestep.
- Ability to organise, prioritise and respond to multiple projects and deadlines.
- Ability to act independently on routine assignments or projects.
- Strong written and verbal communication skills.
- Multiple full-cycle implementations in various industries

Desirable skills and experience:
- Bachelors or Master's Degree in ICT or a related functional sector such as Accounting, Finance, Management Information Systems or Logistics.
- Microsoft certifications in various functional areas of Microsoft Dynamics 365.
- Familiarity with cloud technologies such as MS Azure, LCS, and PowerApps.
- Knowledge of mainstream version control systems such as Azure DevOps.
- Strong presentation and solution demonstration skills.
